MALHAM LIGHTING LTD

ALUMINIUM PROFILES

Aluminium profiles designed to hold flexible LED strip lights for linear lighting.
Other profiles available to order, please enquire.

	picture	suitable LED strip	polycarbonate cover	dimensions	accessories	length	notes
AP001		flexible or rigid strips up to 12mm wide	milky / frosted / transparent light transmittance: 42 % / 75 % / 92 %		**mounting brackets**: stain-less steel **end caps**: closed or with hole	0.5m - 3m	anodizing aluminium recessed installation
AP002		flexible or rigid strips up to 16mm wide	milky / frosted / transparent light transmittance: 42 % / 75 % / 92 %		**mounting brackets**: stain-less steel **end caps**: closed or with hole	0.5m - 3m	anodizing aluminium surface mounted
AP003		flexible or rigid strips up to 16mm wide	milky / frosted / transparent light transmittance: 42 % / 75 % / 92 %		**mounting brackets**: stain-less steel **end caps**: closed or with hole	0.5m - 3m	anodizing aluminium can be surface mounted, used as pendant light, or can be boxed in completely - opal removed from the front
AP004		flexible or rigid strips up to 16mm wide	milky / frosted / transparent light transmittance: 42 % / 75 % / 92 %		**mounting brackets**: stain-less steel **end caps**: closed or with hole	0.5m - 2m	anodizing aluminium easier installation, aluminium profile clips into mounting track
AP005		flexible or rigid strips up to 16mm wide	milky / frosted / transparent light transmittance: 42 % / 75 % / 92 %		**mounting brackets**: stain-less steel **end caps**: closed or with hole	0.5m - 2m	anodizing aluminium easier installation, aluminium profile clips into mounting track
