

## STAIRLINER

The original Stairliner, exclusive to Malham Lighting Ltd., is still the best choice for step edge lighting where safety is concerned. Now available in a wide range of colours with its unique diffusing design that produces an even linear glow. Stairliner presents the light source at an angle of 30 degrees making it visible for those ascending or descending. The profile is designed to accept 50mm 3M grip tape on the top surface (also available in a range of colours) further enhancing the safety of Stairliner.

Available to order in any length up to five metres. Suitable for interior use only.
